

## Specialised Master's in International Financial Analysis

“After a Franco-American management degree, I wanted to develop my expertise in Financial Analysis. The Specialised Master's in Financial Analysis gave me extremely detailed theoretical knowledge and taught me to understand the logic of the markets and financial actors whilst I benefitted from a professional approach with experienced lecturers.

After a seven month placement at the French brokering firm Kepler Capital Markets, I was taken on there in September 2010 as a Sell-Side Equity Research Analyst in the automotive sector. I am in direct contact with investors and sellers and operate directly with a Senior Analyst making credit ratings and stock-exchange recommendations. I realise the value added gained through the course every day.”
