

“After two years as a Design Engineer at the IRD (*Institut de Recherche pour le Développement* – Development Research Institute), I wanted to complement my range of scientific competences by adding managerial ones, and to develop a better overview of the various jobs that go with research.

After completing the Specialist Master’s Degree, I joined a consultancy firm, Alma CG, as Consultant on Research and Development Tax Credit. I then joined Protivsalor Méditerranée, a valorization subsidiary of the University of the Mediterranean at Aix-Marseille II. I support researchers at the University of the Mediterranean in their applications for subsidies to the European Commission in the context of the 7th FPRTD (European Framework Programme for Research and Technical Development).

In this way, I shadow researchers through every stage of a project: from drafting and finalizing the project management document to sometimes negotiating with the European Commission.”

Isabelle AMABILE

Class of 2005

Project Engineer

Protivsalor Méditerranée
